

Section 1: Introduction to Antigravity Cloud

Antigravity Cloud is a high-performance serverless database service built specifically for modern cloud applications.

Section 2: Pricing and Subscription Tiers

The pricing structure of Antigravity Cloud consists of three clear tiers:

1. Free Tier: Costs \$0 per month, supports up to 10,000 read operations per month, and provides 1 GB of storage
2. Developer Tier: Costs \$29 per month, supports up to 1 million read operations, and provides 50 GB of storage
3. Enterprise Tier: Costs \$299 per month, supports unlimited operations, provides 1 TB of storage, and includes

Section 3: Security, Compliance and Replication

Security is built-in with end-to-end TLS 1.3 encryption for all queries in transit. At rest, data is encrypted using AE Antigravity Cloud is currently deployed across three cloud regions: us-east-1 (N. Virginia), eu-west-1 (Ireland), and
